

**The Saviour
PST Repair 1.0
User Guide**

Overview

The Saviour PST Repair offers a complete solution to repair damaged Microsoft Outlook Personal Storage (PST) files.

The software repairs corrupt PST files and restores all its content such as e-mails, attachments, contacts, calendars, tasks and journals. **The Saviour PST Repair** scans and extracts data from a damaged PST file, repairs it and then saves it as a new usable PST file. To view repaired items, you need to import the new PST file into MS Outlook.

The Saviour PST Repair also ensures recovery of accidentally deleted e-mails that you have emptied from the deleted items folder. After recovering the PST file, the software shows its original content. All folders from the original PST file are shown along with their content in a three-pane structure.

Key features:

- Enables you to view messages in a 3-view format.
- Selective recovery of mails.
- Find option to search mails faster.
- Repairs e-mails, calendar entries, contacts, notes, tasks and journals from damaged PST files.
- Restores formatting from RTF and HTML messages.
- Repairs encrypted PST files.
- Repairs PST files larger than 2GB.
- Repaired file is saved as new PST file on any (including network) disk visible by the host operating system.
- Can save single mail messages in MSG, EML, RTF, HTML, and PDF format. Creates unique profile for individual PST files.
- Right-click option to save emails in any one of the following formats from preview section itself - MSG, EML, RTF, HTML, and PDF.
- Option to arrange scanned emails and messages as per Date, From, To, Subject, Type, Attachment, and Importance. You can also arrange the scanned emails in form of groups.
- Support for MS Office 2016 / 2013 / 2010 / 2007 / 2003 / 2002 (XP) / 2000.

Installation Procedure

Before installing the software, ensure that your system meets the minimum system requirements.

Minimum System Requirements

- **Processor:** Pentium Class
- **Operating System:** Windows 10 / Windows 8 / Windows 7 / Windows Vista / Windows XP
- **Memory:** 512 MB
- **Hard Disk:** 50 MB of free space

Ordering the Software

To know more about **The Saviour PST Repair**, click [here](#).

To purchase the software online, please visit <http://www.dsaviour.com/buy-now.php>

Alternatively, click on **Order** icon in **Help** Menu on **Menu** Bar to purchase the software online.

Select either of the methods given above to purchase the software.

Once the order is confirmed, a serial number will be sent to you through e-mail, which would be required to activate the software.

Registering the Software

You can download demo version of **The Saviour PST Repair** software from here. The demo version is just for evaluation purposes and you must eventually register the software to use its full functionality. Once you purchase the software, you will receive a key using which you can register the software.

You can register the software using any of the following methods:

- Online Registration

After purchasing the software, a serial number will be sent via email, which is required to register the software. You need to enter the serial number, which is then verified by a license server and on verification, the software is registered.

- Manual Registration

To register the software manually, you will need to generate a PHX_REG.txt file. After verification of the serial number and purchase details, the site key, which is required to register the software manually, will be sent to your email address.

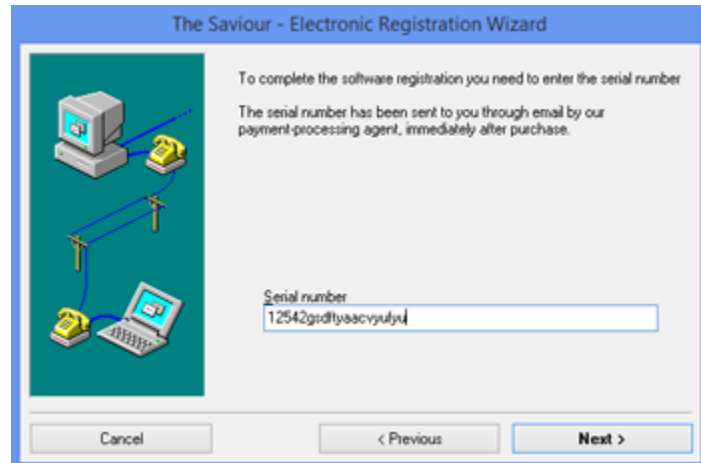

Note: *If the software is downloaded from <http://www.dsaviour.com/buy-now.php> (i.e., ESD version), it must be registered using Serial Number (received through email after purchasing the product) to use all the features of the software.*

If the software is installed using the product installation CD (i.e., BOX version), hardware lock, that is available with the software kit, is mandatory for the functioning of the software.

Online Registration

To register the software online:

1. Launch demo version of **The Saviour PST Repair** software.
2. From **Menu Bar**, select **Registration**. Click **Register**.
3. In **Registration Option** dialog box, select **I have the registration key**.
4. Select **Online Registration**. Click **OK**. A warning will appear, click **OK** to continue.
5. In **Welcome to The Saviour - Electronic Registration Wizard**, click **Next**.
6. Type the serial number (received through email after purchasing the product) in serial number field. Click **Next**.
7. The software would automatically communicate with the license server. After the registration is done, click **Finish** to complete the registration process.

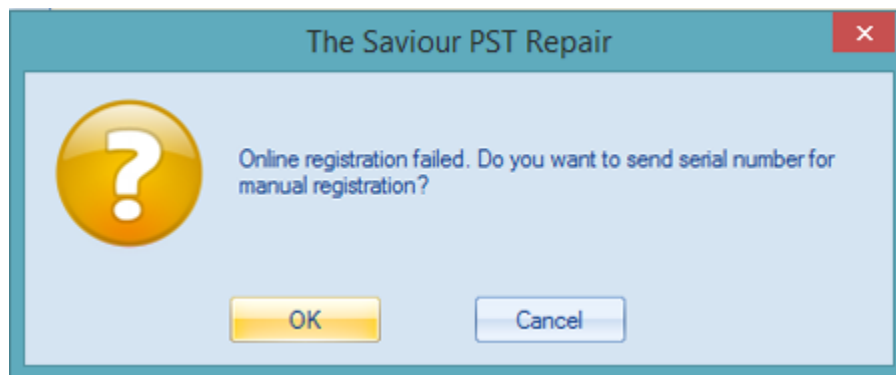

Registration Screen

Note: You can generate PHX_REG.txt file manually via online activation. View [Manual Registration](#) to perform the process of generating PHX_REG.txt file.

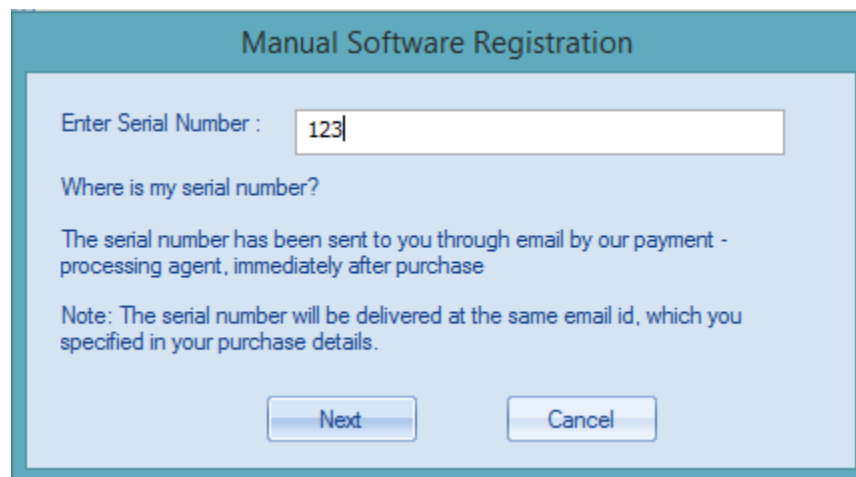

Manual Registration

To register the software manually:

1. Launch the demo version of **The Saviour PST Repair**.
2. From **Menu Bar**, select **Registration** option. Click **Register**.
3. In **Registration Option** dialog box, select **I have the registration key**.
4. Select **Online Registration**. Click **OK**. A warning will appear, click **OK** to continue.
5. In **Welcome to The Saviour - Electronic Registration Wizard**, click **Cancel**.
6. **The Saviour PST Repair** dialog box will open, click **OK**.

7. In **The Saviour PST Repair -Manual Software Registration** dialog box, enter the serial number that you receive once you purchase the software. Click **Next**.

Updating the Software

The Saviour releases periodical software updates for **The Saviour PST Repair** software. You can update the software to keep it up-to-date. These updates can add a new functionality, feature, service, or any other information that can improve the software. Update option of the application is capable of checking for latest updates. This will check for both latest minor and major versions available online. You can easily download minor version through the update wizard. However, the major version, if available, has to be purchased. While updating the software, it's recommended to close all the running programs. Note that demo version of the software cannot be updated.

To update The Saviour PST Repair:

1. Go to **Tools** option in **Menu Bar**. Click **Update Wizard**.
2. **The Saviour Update Wizard** window will open. Click **Next**. The wizard will search for latest updates, and if it finds any new updates, a window will pop up indicating its availability.
3. Click **Next** and the software will download the files from the update server. When the process is complete, the software will upgrade to the latest version.

Live Update may not happen due to following reasons:

- Internet connection failure
- Updates are not available
- Unable to download configuration files
- Unable to locate updated files or version
- Unable to locate executable file

Note: *If a major version is available, you need to purchase the software in order to upgrade it.*
